### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

1. This office action is in response to the election filed August 29, 2005.

#### ***Election/Restrictions***

2. Applicant's election with traverse of Group I in the reply filed on 8/29/05 is acknowledged. The traversal is on the ground(s) that "Restriction Requirements are optional in all cases. MPEP 803. If the search and examination of an entire application can be made without serious burden, the Examiner must examine it on the merits, even though it arguably may include claims to distinct or independent inventions. MPEP 803....Applicant's respectfully submits that these claims can all be easily searched and examined together. This is not found persuasive because searching in a separate area for method (Class 438) and another area for apparatus (Class 257) for two inventions does constitute an undue burden upon the examiner. Finally, the Examiner inadvertently forgot to disclose that claim 1 is generic to claim 18.

The requirement is still deemed proper and is therefore made FINAL.

#### ***Drawings***

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the following must be shown or the feature(s) canceled from the claim(s): a) the first die is encapsulated; and b) the second die is encapsulated. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing

Art Unit: 2822

should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. The drawings are objected to because of the following: a) it is not clear what reference numerals 50, 52, 54 and 56 represent. They are disclosed in the specification however it is not clear what they represent. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

Art Unit: 2822

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1 and 3-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Damberg (U.S. Publication No. 2004/0021211).

In regards to claim 1, Damberg discloses the following:

a) an interposer (20) that includes a fold which divides the interposer into a first section and a second section (For Example: See Figure 4);

b) a first die (44) attached to a first surface of the interposer at the first section and the second section (For Example: See Figure 4);

c) a contact (42) attached to the first surface of the interposer at the first section and the second section (For Example: See Figure 4);

d) a second die (78 and 80) attached to a second surface of the interposer, the second die being stacked onto the first die and electrically coupled to the first die by the contact and conductive paths that are part of the interposer (For Example: See Figure 4).

In regards to claim 3, Damberg discloses the following:

a) the first die is encapsulated on the first surface of the interposer (For Example: See Figure 4).

Art Unit: 2822

In regards to claim 4, Damberg discloses the following:

a) the second die is encapsulated on the second surface of the interposer (For Example: See Figure 4).

In regards to claim 5, Damberg discloses the following:

a) a plurality of contacts that are each attached to the first surface of the interposer at the first section and the second section (For Example: See Paragraph 31) (Note: The contact (44) is made of more than one layer. Therefore, there are a plurality of contacts.).

***Allowable Subject Matter***

7. Claims 2, 6 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
